Data Engineering Leader with 5+ years of experience building and managing high-performing teams, and 10+ years designing scalable data platforms across fintech, marketing, and the public sector. At dv01, grew a product line from the ground up into a multi-million dollar ARR business, delivering data infrastructure for some of the world's largest banks and hedge funds. Passionate about translating complex data problems into reliable, cost-efficient systems and developing engineers into strong technical contributors.

EXPERIENCE

dv01 – Engineering Manager

July 2021 – present

dv01 is a financial technology data management, reporting & analytics platform offering loan-level transparency and insight into lending markets

- Lead inter-departmental team for Data Direct product line <http://dv01.co/offerings/data-direct>
- Grew from team of one to team of five with millions in ARR. Directly manage four people
- Create product roadmap, delegate tasks, run performance reviews, and develop ICs
- Manage costs of Google Cloud Platform (GCP) infrastructure (decreased cost by 24%)
- Plan and lead data product feature rollouts: Snowflake, Databricks (Delta Lake, Iceberg), maintain feature parity with web app and work with sales team on product pricing and support
- Design and maintain data feeds for some of the largest banks and hedge funds in the world
- Led team adoption of AI-assisted development (Claude Code), establishing best practices that improved delivery speed and code quality

dv01 – Senior Data Engineer

July 2020 – July 2021

- Work with data pipeline and business teams to plan, scope, and develop new, scalable features
- Lead product migration from [MSSQL Server to Big Query](#)
- Decrease pipeline write time by 40% by leveraging Big Query SQL, Python, Docker, DBT
- Provide technical leadership to junior engineers and new hires

dv01 – Data Engineer

July 2019 – July 2020

- Evolve the Data offering from one-off custom build to a full product that meets any client's needs
- Build and maintain data pipelines including Airflow DAGs, scheduled jobs, & automated testing
- Lead client meetings, on call and support. Create documentation and marketing from scratch

Major League Soccer – Manager Analytics and Insights

April 2017 – July 2019

- Create data pipeline which in turn powered Tableau insights dashboards for C-Suite as well as dozens of ad hoc user and content analysis dashboards

Orchard Platform (Fintech) – Senior Data Analyst

March 2016 – April 2017

- Create both reports for marketplace lending clients & internal tools (Looker, PySpark, Postgres) to share insights for client services, sales, marketing and data science teams

Organizing for Action Digital Analytics

October 2013 – March 2016

- Data insights and reporting for social media accounts (@barackobama) that reach over 65 million people, a multi-million email list, and website (barackobama.com)

Presenter – Analytics Institute Yearly Conference 2015

University of Illinois at Chicago - Graduate appointment

Aug 2012 – Aug 2013

- Data analysis & visualization for School of Public Health. Results published in [PLOS ONE](#)

Motorola Solutions Inc. – Senior Systems Engineer

Oct 2008 – Aug 2012

- Implemented software and hardware upgrades to multimillion-dollar digital radio systems

EDUCATION

- **University of Illinois Champaign-Urbana**

B.S. Electrical Engineering May 2008
